Intellectual Property For Recording Engineers

Our 2011-2012 kickoff meeting is a must-attend for anyone who records!

Rick DiGiallonardo, Director of Ball State University's program of Music Media Production & Industry, will speak on what engineers and industry professionals need to understand about intellectual property.

DiGiallonardo is actively involved in the industry, is in constant demand as a keyboardist and producer, and we are excited to have him share his wealth of knowledge with the section.

Whether you're a seasoned engineer or a budding student, this meeting is guaranteed to be filled with useful information.
